

Website - ShowCase

<Author>
<Organization>
<date>

- Flash video that guides through the Use Case demo application
- Movie is stopped at significant points and text messages are shown to inform the user about current situation and next steps

Created Using Wink

- Since the DIP Showcase was a big success and its presentation was highlighted by the reviewers, we follow its path:
 - Create a Web-enabled version of a video that guides through (one, or both) Use case demo applications
 - In the video, stop at significant points and present information
- Create a new page at www.tripcom.org that presents these videos

- As proposed by Christian:
 - Source Code
 - Kernel
 - Use cases
 - Compiled kernel
 - (3rd party & kernel) licenses
 - Virtual machine image containing an automatically started kernel
 - Inclusive use cases?
- Installation manuals & documentation for
 - Kernel
 - Use case demo apps

- M30: First Version of UseCase slides (Web version) published on Website
- M35: Draft Version of UseCase Demo Application Flash movies online
- M36: Final Version of UseCase Demo Application Flash movies online
